Templates for the Mac

10 years in the Making.

Mac School Report Manager Templates for the Mac

It's been 10 years in the making (literally), but it's finally here and ready to ship. At 8th Day Consulting, Training & Software we've compiled years of Mac School Report Manager templates into one jam-packed CD-ROM. You will find over 650 templates, including Labels, Student information, Attendance, Discipline, Grade Reporting, Counseling, Health, Teacher Info/Class Management, and Timetables.

What will you get? Included in the package is a 4 inch 3 ring binder containing a printed copy of each template populated with relevant data and a template definition printed on the back of the report. Along with the binder ships a CD that contains all the Report Manager templates, a Template Definition Guide, and a copy of Adobe Acrobat Reader.

The Template Definition guide is a comprehensive data base of the templates. Every report is captured in .pdf file format so you can search on field names, smart item numbers and more to locate the correct template for you. All templates can be used as is or modify as needed.

Pricing Information

The first book your district purchases is \$500. Each additional book is \$100.00 each. Shipping and handling are extra. Send your check to:

Remember this product is covered under U.S. Copyright Law. It is illegal to reproduce the CD or documentation in part or in whole for use outside the building for which it is purchased.

Frequently Asked Questions

If we use Mac School and Open District do the templates still work?

Yes, they work at the school/building from Mac School not Open District. From each building that purchases the Report Manager Templates for the Mac, you may run any of the reports on the CD. We have currently begun recreating all of the reports in the Mac School product for Open District.

May I copy all the templates from the CD to my hard drive?

Yes, but only if your building has purchased the Report Manager Templates for the Mac product. If your building or district has not purchased the product, you do not own a license for it and are prohibited from copying them. It would be as though you went into the grocery store and walked out with a gallon of milk without paying for it just because your neighbor bought a gallon of milk this morning.

May I change or alter the templates from the Report Manager Templates for the Mac product?

Yes, but only if your building has purchased the Report Manager Templates for the Mac product. That is one of the reasons we have released the product. But remember In whole or in part, the templates contained within the Report Manager Templates for the Mac are covered under U.S. Copyright Law.

When I run the templates are many of the columns blank. Why?

The data to populate the reports is house inside of Mac School. The templates only display information which currently exists in your Mac School data base. Therefore, if you don't have student locker numbers or combinations entered within your Mac School data base, they won't appear on the report.

What if when I get my next update a template that worked now doesn't work?

If you look in the binder, you will see the samples we printed. Each template was printed from version 4.8 of Mac School. However, this product is sold "AS IS." We are not responsible for revisions to Chancery Software, Ltd.'s Mac School. Please do not phone Chancery Technical Support. This product is not covered by your current technical support contract.

Is there technical support available with the Report Manager Templates for the Mac product?

Our minimum charge for support is \$50.00 per half hour. Purchase orders must be faxed in advance to (708) 535-1324. We also have template creation services which can be contracted at \$500 per day.
